

AutoCAD Section View

- Draft a working drawing of a radially symmetric object. (It may be an existing object or one of your own design).
- The pages required are:
 - Solid line drawing (no hiddenlines)
 - Hiddenline drawing
 - Section view drawing
- Fully dimension the draft on one of the pages (either the hiddenline drawing or the section view drawing).
- You may include additional pages for detailed views if necessary. Do not include them unless they are ABSOLUTELY necessary to your draft. This assignment is graded on quality, NOT quantity.
- Include a titleblock with your logo.
