## Calculus II

Course Description:

Applications of definite integrals: area, volume, improper integrals, work, arc length, surface area, centroid. Polar coordinates. Parametric curves in two and three dimensions: velocity, speed and acceleration. Partial derivatives and the chain rule, properties of the gradient. Maxima and minima. Sequences and series: convergence of sequences and series, Taylor and Maclaurin series, power series. 4 credits; 5 contact hours.
Prerequisite: Ma111; prerequisite or corequisite: Ma110.

| Course Objectives: | 1. Apply the definite integral to solve problems in geometry, physics, and other fields. <br> 2. Introduce the differential calculus of functions of several variables and solve multivariable constrained optimization problems. <br> 3. Develop the mathematical theory of sequences and series. |
| :---: | :---: |
| Instructor: | Mili Shah (mili@cooper.edu) <br> 41 Cooper Square, Room 311 http://faculty.cooper.edu/mili |
| Meetings: | Recitation: Monday 09:00AM - 9:50AM Lecture: Wednesday 09:00AM - 10:50AM Lecture: Friday 9:00AM - 10:50PM |
| Office Hours: | Monday 10:00AM-10:50AM or by appointment |
| Participation: | Please contribute to the classroom environment by asking questions and participating in discussions. Your interaction will be considered when assigning borderline grades, as will improving performance throughout the course of the semester. |
| Exams: | Three exams ( $20 \%$ each) and one final (30\%) will be given during the semester. You may not use outside resources: calculators, other students, other books, etc. |
| Homework: | Suggested homework problems are posted on the following page. These homework problems will not be graded but are representative of information that is required. Similar homework will be presented on quizzes, exams, and finals. |
| Quizzes: | There will be quizzes given throughout the semester due Mondays at $11: 59 \mathrm{pm}$. These will be based on problems from the previous week. Collectively, these quizzes will constitute $10 \%$ of the final grade. |
| Grading: | Quizzes: Due Mondays at 11:59pm (10\% of final grade) <br> Exam 1: Wednesday, February 10 (20\% of final grade) <br> Exam 2: Friday, March 12 ( $20 \%$ of final grade) <br> Exam 3: Wednesday, April 14 (20\% of final grade) <br> Final Exam: Wednesday, May 12 (30\% of final grade) <br> Note: I reserve the right to adapt quiz and exam dates. |
| Assessment: | Quizzes and exams will be posted on the website https://app.rederly.com/common/courses/enroll/MA113D_SPRING2021_CAFJ Please register for the class using your Cooper email. |
| Late policy: | No quiz, exam, or final may be made up without prior arrangement or a written excuse. |
| Text: | Thomas, Weir, and Hass, Thomas' Calculus, 12th edition, Pearson (2009) ISBN-13: 978-0321587992 |
| Disabilities: | If you believe you are entitled to an accommodation on assessments through the Americans with Disabilities Act, you must self-identify to the Office of the Dean of Students and meet with me during the first week of the term to discuss arrangements for meeting your accommodation. |

2. Introduce the differential calculus of functions of several variables and solve multivariable constrained optimization problems.
