Problem #1 (Routine computational problem)
3 Work following a correct procedure culminating in a correct answer is clearly presented.
2 Clear presentation following a correct procedure, but incorrect answer due to minor careless error.
2 Correct answer, but with inadequate presentation of supporting work.
1 Problem attempted, but not clearly following a correct method.
0 Problem left unattempted.

Problem #2 (Conceptual problem)
3 Reasoning is clear, complete, and correct.
2 Presentation captures the key idea, but reasoning is flawed or incomplete.
1 Problem attempted, but no coherent argument is included.
0 Problem left unattempted.

Overall spot check
4 Submission appears to include answers and adequate supporting work for all or the vast majority of assigned problems.
3 All or most problems have been attempted, but supporting work appears to regularly omit significant details.
2 Many problems are missing, or supporting work is virtually nonexistent.
1 Most problems are missing.
0 No problems have been attempted.
